

STEP ONE- TAKE LID DIMENSIONS: SECTION A-A

(Take measurements from several different points and average to compensate for off-round/off-center lids...)

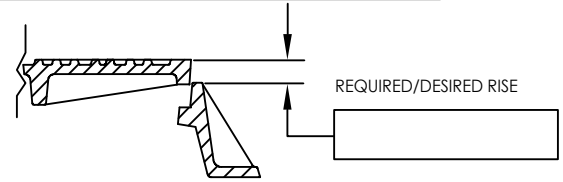

STEP TWO- TAKE RING DIMENSIONS: SECTION A-A

(Take measurements from several different points and average to compensate for off-round/off-center rings...)

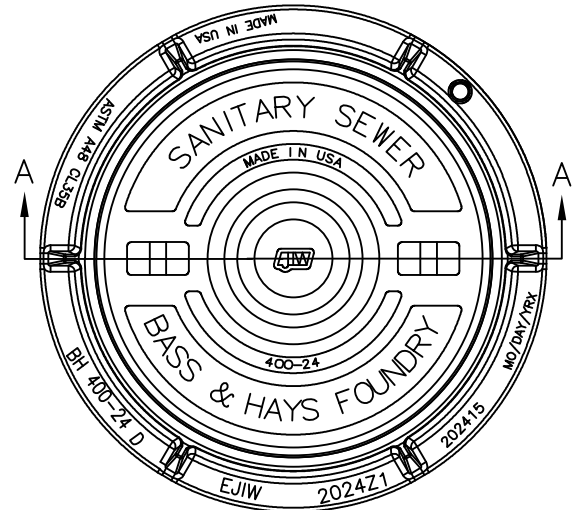

STEP THREE- DETERMINE DESIRED RISE DIMENSION(S)

(Determine the exact measurement of the rise you need- for most sizes going under lid size is OK... call for details)

EXAMPLE- BASS & HAYS 400-24® MANHOLE A-A SECTION
WILL WORK WITH ANY TYPE OF RING & COVER PRODUCT (WITH YOUR MEASUREMENTS)

Fill in all dimension boxes for best fit...
If a dimension is not applicable, put N/A in the box.
Will be fabricated to YOUR measurements, check twice.
Not responsible for poor fit if your measurements are not exact.
